About this assessment

- There are three assessment tasks in this assessment. You must complete all three tasks.
- This is an open book assessment. However, all answers must be in your own words.

Important Note for Assessors

Before giving the assessment to learners, the assessor must refer to the Important Note for Assessors and Guidance Information given in the Assessment Sample Answers document.

Learner Declaration

I confirm that I have read and understood the conditions of this assessment, and have had the opportunity to get any clarification that I need from my assessor. Any health and safety requirements that I must observe have been outlined. I confirm that all work completed for this assessment is my own and has been produced without assistance from anyone else. Finally, I confirm that the process by which I may seek a review of the marking for this assessment has been outlined to me.

Assessment Task 1: Legal requirements and ethical responsibilities when using digital tools

What you need to do

health and safety	**information privacy**	**copyright**
software licensing	**guidelines for using computers**	**cyber safety**

The box below lists types of legislation and guidelines relevant to the use of digital devices. Read each of the scenarios that follow and answer the questions for each scenario.

Scenario 1
Sally works for a small engineering firm. She is responsible for client accounts and has access to the company's database that stores all their clients' personal details.

Question 1: Which type of legislation will Sally need to keep in mind with regard to the clients' personal details she has access to? (Choose from the list given at the start of the assessment task.)

Question 2: What are the main points of this type of legislation that Sally needs to be aware of and apply?

- Your description needs to include at least three points, and examples to support your answer.
- Include the name(s) of specific legislation that may apply.

INSTANT Education Solutions

Question 3: What are Sally's ethical responsibilities regarding her access to clients' personal details?

Scenario 2
Andrew works full-time as an admin assistant in a large company. He spends most of his eight-hour day working on his desktop computer, entering data, typing documents and emails, etc.

Question 1:
a. What guidance does Andrew need to keep in mind when doing his job? (Choose from the list given at the start of the assessment task.)

b. Name the government agency that provides that guidance.

Question 2: What are some of the main factors in this guidance that Andrew needs to be aware of and apply when he does his job?

- Your description needs to include at least three points, and examples to support your answer.

Scenario 3
Angela is trying to find some images to use in a project she needs to complete. She has decided to try to find some suitable images online.

Question 1: Which type of legislation will Angela need to keep in mind when sourcing and using images from the internet in her project? (Choose from the list given at the start of the assessment task.)

Question 2: What are the main points of this legislation that Angela needs to be aware of?

- Your description needs to include at least three points, and examples to support your answer.
- Include the name(s) of specific legislation that may apply.

Question 3: What are Angela's ethical responsibilities downloading and using images?

1c © Instant Education Solutions Ltd www.instant.org.nz

Scenario 4
Angela wants to download and use some image editing software to help her prepare the images to be used in her project.

Question 1: Which type of legislation will Angela need to keep in mind when downloading and using the image editing software? (Choose from the list given at the start of the assessment task.)

Question 2: What are the main points of this type of legislation that Angela needs to be aware of?
Your description needs to include at least three points, and examples to support your answer. Include the name(s) of specific legislation that may apply.

Question 3: What are Angela's ethical responsibilities when downloading and using software?

Scenario 5
Tiger works in a fast-paced work environment, where sometimes things get stressful and he needs to work long hours. As part of his job, Tiger needs to communicate with clients and colleagues using a range of tools such as email, social media apps (eg Facebook, Instagram), etc. Tiger uses a wide range of digital devices to do his job, including printers, tablets, mobile phones, a laptop, and a desktop computer.

Question 1: Which type of legislation will Tiger and his employer need to adhere to in terms of Tiger using these digital devices to do his job? (Choose from the list given at the start of the assessment task.)

Question 2: What are the main points of this type of legislation that Tiger and his employer need to make sure they adhere to?

- Your description needs to include at least three points, and examples to support your answer.
- Include the name(s) of specific legislation that may apply.

Scenario 6
Jessie uses her phone a lot for communicating online over social media and messaging apps. She also does a lot of purchasing and online banking using her phone.

Question 1: What legislation does Jessie need to follow when communicating with others online?

Give three examples of the types of statements a digital communication should NOT contain.

Question 2: Jessie shares information about herself and her life online. What sort of information should she never share on social media?

Assessment Task 2: Security risks

What you need to do

There are many basic security risks that may apply when using digital tools.

1. Choose at least five security risks when using digital tools.
2. For each security risk you have chosen, do the following:
   - Name the security risk (eg malware, natural disaster)
   - Describe the security risk in terms of the potential impact it could have on data, or a computing system. Give an example(s) to support your answer. Your example may relate to a home, work, or study environment.

Security Risk 1 (name the risk):

Assessment Task 3: Security measures and solutions

What you need to do

There are various security measures (procedures) or solutions that can be used for basic security when using digital tools in a home, work, or study context. In this assessment task you must identify and describe these procedures or solutions, and show that you can implement and maintain them.

This task has two parts. You must complete both parts.

Part A: You must identify and describe security measures or solutions that can be used for basic security when using digital tools.

Part B: You must demonstrate their implementation and maintenance.

Part A

Select five security measures/solutions that could be used for basic security when using digital tools.

For each security measure/solution, do the following:

- Name the security measure/solution (eg UPS or surge protector; personal network protection)
- Describe the security measure/solution in terms of how it can help to provide basic security when using digital tools (ie how it can help guard against security risks). Give an example(s) to support your answer. Your example may relate to a home, work, or study environment.

Security Procedure/Solution 1 (name the procedure/solution):

Description of procedure/solution:

Security Procedure/Solution 2 (name the procedure/solution):

Security Procedure/Solution 5 (name the procedure/solution):

Description of procedure/solution:

OPTIONAL

Security Procedure/Solution 6 (name the procedure/solution):

Description of procedure/solution:

Part B

Your assessor must observe you demonstrating and maintaining security measures/solutions for the use of digital tools. This can be in a home, work or study context.

You must demonstrate at least **five** security measures/solutions. Your assessor will complete the following Assessor Checklist to record their observation.

Assessor Checklist for Unit 32975v1		
Use digital tools securely, safely, ethically and legally		Level 2 Credits 5
Learner's Name:		**Date:**
Course:		**NZN No.:**
PC	**Requirements**	✓
2.3	The learner demonstrated and maintained at least 5 security measures or solutions. Note the security measure/solution and comment on what you observed.	
	1. Security Measure:	
	Assessor's Comments [Comment on what the learner demonstrated and how they maintained the measure/solution]:	
	2. Security measure:	
	Assessor's Comments [Comment on what the learner demonstrated and how they maintained the measure/solution]:
